THERMAL TEMPERATURE CAMERA

FAST-PASS[®]

VISITOR MANAGEMENT SOLUTIONS

FEATURES:

Risk Management

Alleviate potential health risks by setting temperature parameters for visitors entering the building.

Efficiency

Complete visitor registration and temperature verification within seconds.

Federal Compliance

Comply with the CDC's recommendation of pre-screening all employees and visitors to ensure body temperatures do not exceed 100.4° F (38.0° C).

Simple Integration

Integrate thermal camera with FAST-PASS Visitor Management software.

HEALTHCARE • EDUCATION • COMMERCIAL
LAW ENFORCEMENT • CONSTRUCTION
GOVERNMENT / MILITARY
MULTI-UNIT RESIDENTIAL

HOW IT WORKS:

The FAST-PASS Contactless Visitor Management Solution now includes a thermal temperature camera as an added precaution for stopping the spread of contagious illnesses.

If a visitor's temperature reading is higher than the threshold mandated by a facility, the registration attendant is notified immediately. The procedural steps following the notification will be at the discretion of each end user.

FAST . EASY . ACCURATE
